

Minutes: NEX meeting Date: Friday January 21 st Time: 11:00 – 12:30 CET Place: Teams	 Nordic ECP/EDX Group

Present:

- Filip Åhrberg
- Jacob Dall
- Harry Petersen
- Matti Harju
- Morten Simonsen
- Michael Rulle
- Teemu Sainio
- Emil Rossing
- Sam Chabok

1 Agenda

- TSO status meeting

2 Action points from the previous meeting

3 TSO statuses

Status of each TSO and active ECP participant of NEM (Nordic ECP Network).

RSC

- Looking at the OPDE integration options (file share , AMQP or WS) and HA solution or how to achieve HA-like level by other means for example standby endpoint)
- Certificate renewal issues.
- Discussion about merging RSC and OPDE networks

eSett

- No production issues
- Prod Freeze is over

Energinet

- NEM Endpoint seems to freeze occasionally, takes about 15min to recover. No messages are delivered during the outage, occurs only on test and pre-prod environments

SVK

- No big issues with production recently
- Next step upgrading ECP components to 4.8.2

Fingrid

- No big issues with production recently
- Next step upgrading ECP components to 4.8.1

Statnett

- No production issues
- Morten has written a tool to monitor endpoint throughput

NBM

- Soft deadline for NBM to use production ECP network 8th of Feb.
 - o all data that is now being sent to preprod network needs to go to prod network.
 - o If ECO2/preprod env is used as well, then the same data has to go there.

Other:

- Discussion whether BSP's should be part of the failover path solution and is that necessary
